Ahiya Butman

Systems Developer & AI Architect
Intention. Clarity. Results.

ahiya.xyz   ahiya.butman@gmail.com   github.com/Ahiya1

I build intelligent software systems that solve real business problems. From research automation to SaaS tools to AI pipelines, I take projects from concept to deployed product in weeks, not months.

CAPABILITIES

Full-Stack SaaS Systems
User management, dashboards, admin panels, auth, analytics

Research Tools & Statistical Systems
Factorial design engines, dataset generation, analysis

Custom APIs & Infrastructure
Fast, scalable, containerized, production-ready

AI Pipelines & Orchestration
Embedding workflows, RAG systems, multi-agent reasoning

Business Automation Tools
Internal dashboards, workflow automation, CRM-like tools

Premium Web UIs
Beautiful, responsive, production-ready interfaces

SELECTED WORK

StatViz
Statistical Reports Platform
B2B platform for interactive statistical reports with Hebrew support and password-protected access.

SelahReach
Intelligent Outreach Automation
AI-powered outreach system with Claude Code integration for personalized client communication.

Mirror of Dreams
AI Life Dreams Companion
AI-powered life dreams exploration with personalized insights, reflection prompts, and growth tracking.

AI Research Pipeline
Factorial Design Tool
Controlled, demographically weighted narrative generation for academic research at scale.

TECH STACK

Python   TypeScript   React   Next.js   Node.js   FastAPI   Flask   PostgreSQL   MongoDB   Supabase

Docker   OpenAI API   Claude API   Vector Stores   Tailwind CSS   Vercel   GitHub Actions

Available for 1-2 mid-size projects per month
Let's build something great together
