VISION

I design and ship production-grade software where agents, data pipelines, and execution loops converge. Clarity in architecture. Precision in delivery.

Independent by default. Selective collaboration when alignment is clear.

SYSTEMS

2L
AI agent orchestration framework for parallel software delivery

AI Research Pipeline
Factorial design engine for controlled academic data generation

StatViz
B2B statistical reports platform with Hebrew RTL support

SelahReach
Intelligent outreach automation with Claude Code integration

SCOPE

- Part-time engagements only
- Remote-first, timezone-flexible
- Systems, agents, AI pipelines, automation
