Ahiya Butman

Systems Developer & AI Architect
Intention. Clarity. Results.

ahiya.xyz   ahiya.butman@gmail.com   github.com/Ahiya1

I build intelligent software systems that solve real business problems. From research automation to SaaS tools to AI pipelines, I take projects from concept to deployed product in weeks, not months.

CAPABILITIES

Full-Stack SaaS Systems
User management, dashboards, admin panels, auth, analytics

AI Pipelines & Orchestration
Embedding workflows, RAG systems, multi-agent reasoning

Research Tools & Statistical Systems
Factorial design engines, dataset generation, analysis

Business Automation Tools
Internal dashboards, workflow automation, CRM-like tools

Custom APIs & Infrastructure
Fast, scalable, containerized, production-ready

UX-Light Tools, Heavy Logic
Minimal interfaces backed by powerful systems

SELECTED WORK

StatViz
Statistical Reports Platform
B2B platform for interactive statistical reports with Hebrew support and password-protected access.

Wealth
Personal Finance SaaS
Complete budgeting with Israeli bank connections, AI categorization, and forecasting.

Mirror of Dreams
AI Reflection Engine
Semantic journaling with insights, prompt flows, vector search, and daily reflection cycles.

AI Research Pipeline
Factorial Design Tool
Controlled, demographically weighted narrative generation for academic research at scale.

TECH STACK

Python · TypeScript · React · Next.js · Node.js · FastAPI · Flask · PostgreSQL · MongoDB · Supabase

Docker · OpenAI API · Claude API · Vector Stores · Tailwind CSS · Vercel · GitHub Actions

Available for 1-2 mid-size projects per month
Let's build something great together
